FOR IMMEDIATE RELEASE

VACUUM INLET TRAPS PERMIT FAST FILTER MEDIA CHANGES

A line of vacuum pump inlet traps that can be easily customized by a user for various applications in small laboratories and R/D environments is available from MV Products of North Billerica, Massachusetts.

[MV PosiTrap[®] Vacuum Inlet Traps](#) protect pumps in smaller environments up to 50 CFM by removing corrosive and abrasive particles from the vacuum stream. Permitting fast filter media changes, these traps feature quick-release clamps and replaceable filter elements for absorbing organic solvents, neutralizing acids, trapping mercury vapor, and particulates.

Positively sealed to prevent blow-by, the filter elements for [MV PosiTrap[®] Vacuum Inlet Traps](#) include: Sodasorb[®], activated charcoal, stainless steel- and copper gauze, molecular sieves, activated alumina, and pleated polypropylene in 2, 5, 20, and 90 micron sizes. Traps come in 4" and 8" models that hold one- and four filter elements, respectively.

[MV PosiTrap[®] Vacuum Inlet Traps](#) are priced from \$195.00 ea., depending upon size and the type of filter element. Literature is available upon request.
